

## Moscow on the Cahaba Part II

Boris the "Professional Planner" says "leave the dogs at the dog track and the horses at the horse track and join in the fun filled game of chance - Shelby County's "LOTTO for LAND" - Everybody is a winner!"

Natasha, award winning supreme-soviet socialist social planner (SSSSP) of the Fatherland's Population Gulag Number 66 opened the most recent letter from her comrade in "social change," Boris the Professional Planner (PP), and reads:

"Natasha, darling, my second trip from the Fatherland aboard the luxury tramp steamer was most delightful, I got sick only once. I met Juan I at the secret undisclosed port in the secret undisclosed country, you know (Mexico). Juan I was a very interesting individual, he spoke the language of the Fatherland fluently, many middle eastern languages as well, with some broken English, he said he is contracting with several travel agencies booking numerous one way guided tours north for large groups of middle eastern men, all with the name Omar. He said the additional influx of middle-eastern business travelers coupled with the substantial number of Mexicans in need of travel information and assistance was overwhelming – so much so that he was considering hiring his cousin Juan Ia."

"After several days journey north with some very unfriendly Omars we met Juan II, a most efficient tour guide - he marked both sides of the footpath across the southern US border with empty milk cartons, assort trash and discarded medical supplies. During a break Juan II informed me that before North American Free Trade Agreement (NAFTA) his travel agency was nearly bankrupt, but, in 1992 globalist members of the US House of Representatives passed NAFTA and now his business is booming (nice choice of words – don't you think?). Juan II asked, what part of the country do you intend to call home? I proudly said, I had promise of a very influential position in the neo Red Square, - the new Kremlin of the South – Shelby County, Alabama. He thoughtfully replied, "had globalist Congressmen Spencer Bachus, resident of the Shelby County area and Representative for the sixth district of Alabama, not supported and voted for NAFTA, we probably wouldn't be having the conversation."

"Gee Natasha, ain't the new world wonderful."

"The rest of the journey, which lasted over night was most comfortable, I had a sleeper position in the back of a fifteen passenger van arriving at the immigrant welcoming center in the new Fatherland at dawn. After refreshments and orientation I continued my study of the Shelby County Comprehensive Plan paying special attention to Part IV - Implementation.

. I learned that just like the Fatherland, adept-linguists use pleasant sounding language to control people, in this example – environmental language works well. Hear, Natasha, in the following quote, the poetic ring of the hammer striking the sickle:”

Criteria and performance standards shall be developed for:”

- ensuring the sustainability (*of the*) green infrastructure;”
- “equitable and functional distribution of housing affordability;”
- ensure that rural roads remain rural roads;”
- ensure the willing (*think – Natasha how will the unwilling be made willing*) participation of land owners and land developers<sup>1</sup>”

“Just based on this partial quote, consider, Natasha the needless endless regulations and standards, the socially intrusive surveys that an award winning supreme-soviet socialist social planner (SSSSP) such as yourself could impose on innocent unsuspecting citizens - all, in the name of protecting the environment and enhancing the general welfare of the community.”

“I have to close for now, the limo is here to take all non-documented workers to our government provided “equitable and functional” affordable housing. I understand that part of home ownership for those that can afford to live in a \$250,000 neighborhood is a mandatory – voluntary requirement that each limo of non-documented workers must be met with a hot meal from the “welcome wagon” and each bed will have fresh linen with a mint placed on the pillow. Failure to comply or show non- support with the mandatory-voluntary requirement will result with a demerit on the neighborhood’s “sustainable indicator”<sup>2</sup> for “social adequacy”.

“Sweetest Natasha, your ability to formulate “social adequacy” - “sustainable indicators” and “enforcement regulations” and your years of experience at the Fatherland’s Population Gulag Number 66, has been recognized as a world class accomplishments. With such reorganization, it is only fitting that you should become my assistant. Do inform your Boris poopie in you next letter so that I can make travel accommodations for you.”

“Until then your loving COMRADE in SOCIAL CHANGE, Boris”

Will Natasha join Boris in blissful comradeship for social change in the - neo Red Square, - the new Kremlin of the South – Shelby County, Alabama? Or, will the fallen nature of man break through the façade of social benevolence as Boris and Natasha struggle to gain ascendancy? You guessed it – stay tuned.
