

Moscow on the Cahaba Part VI

Boris the “Professional Planner” says: “Lotto for Land – loss of land rights is just beginning for happy “sustainable citizens” in Shelby County’s, “community of communities”¹ or one of the twelve counties of the coming “Regional Government^{1a}”.

“Natasha, dearest, Boris finally convinced the Column Administrator (CA) to FIRE the announcer, - he took up too much column space. I said: “CA I can use half the column space and maintain article continuity” I demonstrated - Boris, the Professional Planner PP, in need of employment, relocated to Shelby County, Alabama and perceiving an opportunity to expand his bureaucratic prowess requested his able and beloved companion, Natasha, - award winning “Supreme-Soviet Socialist Social Planner” (SSSSP) for the Fatherland’s Population Gulag Number 66 to join him. Then, I used my suave and tactful approach - I said the announcer is:”

- diversity challenged”²,
- intergenerational”/“intragenerational”³ incapacitated,
- gender insentive⁴,
- opposed to gender neutrality⁵ and”
- opposes computerized data at the global, national, and local level for gender inequities.⁶”

“I explained that if the public became aware of the announcer’s biased and unsustainable viewpoints, it would tarnish my socialist reputation, and he would no longer have a high profile socialist for his column, and this would force the CA to recruit socialist talent of equivalent stature. Natasha, we both know that without my influential persona, his column would be a disaster. The CA, caught in this unsustainable situation, was ready for the knockout punch – I said, “not only would my reputation be ruined, but do you realize CA, that compensating the announcer for each word spoken is an “Incentive Based Payment Method”, - that follows capitalist logic – the more I accomplish (work) the more money I’ll make. – CA, this places in jeopardy your “personal sustainability index”⁷ within the newly structured governmental “ecosystem.”⁸ It is a “capitalist transgression”. The CA threw up his hands and said: “Boris, you have the column”.

“Natasha, think of the opportunities here in the Neo-Red Square – the New Kremlin of the South - Shelby County, Alabama. If you accept my offer, you will be working for Boris - “Appointed Professional Planner” APP. My position with a first stage “Sustainable Development” (SD) project, which is well underway here in Shelby County, will allow me to place you in charge of the “Bureau of ID” (Incentive⁹/Disincentive).

“ID” will write the Inducement/Enforcement Regulations (IER) for the reorganization of the society. In this capacity, your first responsibility will be to write “inducement” regulations for all of the SD principles Boris cited to the CA (just the beginning-many more to follow). Next, you will write “enforcement” regulations⁹ and with the stealth ability provided by computers, allowing US to pier into everyone’s financial-transaction,^{9a} we will be able to monitor progress toward SD. Should “inducements” fail, Boris, through public/private partnerships⁹ will provide the needed “push” in the proper direction.”

“The Bureau of ID will quickly expand to include a twelve county “ecosystem management” scheme. “Community/Sustainable indicators”, written by the quasi-governmental organization Region 2020, for the twelve county area, available on the organization’s website¹⁰, will provide us with the current degree of socialization and allow us to determine how rapidly we are progressing up the “Sustainable” ladder.”

“Poopie, just think of it as a wheel with Shelby County as the Socialist hub and the surrounding counties as the satellite provinces filled with fertile soil eager to accept socialist/sustainable seeds. We will, as a recent President stated: “grow their investment”, the process will encumber their society and fulfill our dreams.”

“Natasha, it was my intention in this letter to inform you of the continuity of policy between county and municipal Comprehensive Plans within the State. But, due to my explanation of the discharge of the announcer, a thrilling development, I will postpone revealing the ludicrous polices proposed by PPs, that seemingly intelligent elected officials have adopted - until my next letter.”

“Your, beloved Boris – PP”

1. “Promote a common framework within which Shelby County and its communities build, develop, and redevelop over time, to achieve the vision of “community of communities.” “The county’s communities will grow through concentration and redevelopment in their core, centers and focus areas, consistent with countywide transportation network, with as many activities as possible located within walking distance of one or more of Shelby County’s hierarchy of centers. In this way, community cores and centers will grow by infilling underdeveloped and vacant areas rather than simply growing outward.” Section II page 1 & 2

1a. Region 2020 is a well-connected want-to-be governmental entity, page 10 of their publication “The Book”, available on line at states: “To develop a region that achieves **regional governance** with Home Rule..” emphasis added

2. New Jersey - “Living with the Future in Mind”

3. *Burn a gallon of gasoline and you deplete a nonrenewable resource, this deprives the next generation's opportunity.* – “Intergenerational equity is the principle by which each generation utilizes and conserves the stock of **natural resources**...in a manner that does not compromise their use by future generations.” ---

“Intragenerational equity is the principle by which all sections of the community share equitably in the costs and benefits of achieving **sustainable development**.” “Sustainable Development Department (SD), Food and Agriculture Organization of the United Nations” http://www.fao.org/documents/show_cdr.asp?url_file=/docrep/W8440e/W8440e30.htm

4. Office of Special Advisor on Gender - GENDER MAINSTREAMING MANDATES: SUSTAINABLE DEVELOPMENT –“.. mainstreaming of a gender perspective into the development and implementation of all legislation, policies and programmes, with a view to achieving gender equality,”

5. United Nations - “Gender and Energy for Sustainable Development: A Toolkit and Resource Guide” “In principle, public expenditures on social services and infrastructure are allocated on a **gender-neutral** basis. In practice, however, men and women have different needs and they use and benefit from services differently; budget allocations may not reflect those differences. Budgetary allocations have the power to transform gender inequalities.”

6. This document is on the University of Wisconsin's website: Gender Perspective of ICA (International Co-operative Alliance) - Europe Reports "The absence of gender-disaggregated data based on separate records for men and women, is a source of gender blindness and gender bias against women."
