

# “Moscow on the Cahaba”

## Chapter II Part V

### Segment A

## “FIKO and the Cattle Prod Teeth”

The assembled audience anxiously waits as the “Observant Technician” (OT) dutifully throws the “on air” switch and the “Competent and Assertive Announcer” (CAA) steps to the microphone and says:

“Welcome back to yet another “Exciting Epic Episode” (EEE) of “Moscow on the Cahaba” - “FIKO and the Cattle Prod Teeth”. We join “Comrade Boris” (CB) as he describes to Natasha - “Supreme Soviet Socialist Facilitator” (SSSF) pertinent details of the FIKO program.”

Natasha, Poopice, darling, Boris assures you that this EEE of MY renowned series will not be cut short as was apparently the case for last week’s EEE. Why was last week’s EEE cut short? A conspiracy! A conspiracy of the highest order! Working through an extensive network of “Social Facilitators” (SFs) and “Code Enforcement Officers” (CEOs), tenets of the conspiracy, obviously incubated and contrived in the depths of the “Black Helicopter Crowd” (BHC), have revealed that the CAA and the OT are working in collusion. While the evidence is not conclusive, I, Boris, have applied the “Precautionary Principle” (PP). Poopice, you will recall that the PP (number 15) is part and parcel of the 27 principles<sup>1</sup> that President Papa Bush<sup>2</sup> adopted for the United States when he signed “Agenda 21<sup>3</sup>” at the 1992 United Nations “Earth Summit” Conference held in Rio de Janeiro. Of course, President Clinton complied with the new policy by creating many new programs including the “President’s Council on Sustainable Development<sup>4</sup>”. The current President, not falling far from the “Tree of the New Paradigm” (TNP) in 2002, sent to the World Summit on Sustainable Development<sup>5</sup> “Secretary of State” (SS) Colin Powell. SS Powell reaffirmed, in the following statement to the conference, the United States commitment to adopt “sustainability” as society’s benchmark:

“Ladies and gentlemen, President Bush and the American people have an enduring commitment to sustainable development.”<sup>6</sup>

Poopice, using the PP – “lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation<sup>7</sup>”, is making great inroads in the judicial system of Boris’s adopted Fatherland. The principle, which quashes the long-held concept, based on Biblical principle, found in verse four of Romans thirteen, which basically states that the individual is innocent until proven guilty, is being taught with increasing potency to each succeeding law<sup>7a</sup> school class. The effort will prove to be a bonanza for new property rights confiscation initiatives utilizing “Sustainable Development Principles” (SDPs). The ideology that property ownership is sacred will give way to socialist scrutiny that the property owner may not be utilizing his property in the best interest of society<sup>8</sup>. Computer programs incorporating “Best Management Practices<sup>9</sup>” (BMPs) criteria will establish a land evaluation system, such as the “Land Evaluation and Site Assessment Model<sup>10</sup>” (LESA) under adoption in the State of Wisconsin.

Natasha, after we - “Socialist Comrade Commissars” (SCCs) - firmly implant the PP into the Environmental Justice (EJ) system,<sup>11</sup> it will be easy to expand the concept into the social and economic aspects of “Sustainable Development”. Poopice, can you say “YA VOL MON FURAH<sup>12</sup>” and “DA<sup>13</sup>” in the same sentence? Job opportunities will abound, especially for one such as yourself, the quintessential SSSF. Just remember, Poopice, as we say in my adopted fatherland, the Neo Kremlin of the New South – Shelby County, Alabama – “We’ll keep the light on for ya!”

The OT pushes the ten-second-warning light and the CAA steps to the microphone and in his deep resonating voice says:

“As usual, Boris’s brevity has extended beyond the time constraints of this Public Broadcast Channel. Tune in next time when Boris, the “Consummate Comrade Commissar” (CCC), may possibly return to the appropriate subject and explain the FIKO program – Good-day.”
